

**ProcessMaker<sup>®</sup> BPM is one of first applications to be certified through the Intel<sup>®</sup> Certified Solutions Program**

*- ProcessMaker will be available on the Intel<sup>®</sup> Business Exchange -*

**Cambridge, MA – August 20, 2008** – Colosa, a developer of business process management (BPM) software that enables small and medium enterprises (SMEs) to simplify workflow through the automation of paper-based processes, has announced that its flagship solution, ProcessMaker, is one of the first applications to achieve certification through the Intel<sup>®</sup> Certified Solutions Program and will be available on the Intel<sup>®</sup> Business Exchange. The Intel Business Exchange is an online marketplace for small and medium businesses to search for and buy software specifically geared towards their special needs.

The Intel Certified Solutions Program certification service is provided by SpikeSource, a leader in software assembly, testing, packaging and updating. The automated testing and validation process reduces development and support costs for software vendors, and provides end users with a greatly enhanced experience by ensuring secure, high quality software that is optimized for Intel Architecture.

Colosa's ProcessMaker is an open source BPM solution that SMEs use to simplify workflow and business processes. Users pay for support and services, and do not have to pay for licenses or upfront sign up fees. ProcessMaker is affordable and high-quality, and allows SMEs to better compete with larger organizations.

"To be one of the first participants in Intel's program is testimony to our commitment to the Intel platform and the SME market," said Brian Reale, CEO of Colosa. "Intel is simplifying the software decision-making and buying process for SMEs, which is in line with our goals. Our team has worked hard to deliver a product to achieve this certification."

"Small- and medium-sized businesses depend on Intel technology to stay competitive," says J. Scott Harrison, director Partner Programs Organization for Intel. "For those businesses, we hope that the Intel brand is a symbol of assured quality and that when they see the Intel Certified logo, they know that it's a solution that they can trust."

### **About Colosa**

Colosa is a developer of software solutions that enable companies to simplify workflow through the capture and automation of business processes.

The company's flagship product, ProcessMaker ([www.processmaker.com](http://www.processmaker.com)) is an open source application which enables SMEs to automate document intensive, approval-based processes across systems including finance, HR and operations. ProcessMaker is an AJAX enabled, SOA, web-based application that allows users across single and multiple sites to create and share workflows, customize forms, manage processes, and enhance reporting.

ProcessMaker OSS is available for download at <http://sourceforge.net/projects/processmaker/> and both versions are available at [www.processmaker.com](http://www.processmaker.com).

Colosa was founded in 2000 and has customers in local and central government, retail, insurance, and finance. Colosa is based in Cambridge, Massachusetts with offices in Coral Gables, FL; La Paz, Bolivia; and Lima, Peru. For more information visit [www.processmaker.com](http://www.processmaker.com)
