

Colosa announces partnership with CyberOptic Group, LLC

Brooklyn, NY – August 29, 2008 - Colosa, Inc., the developers of ProcessMaker, a commercial open source workflow management software designed for small to medium-sized businesses and organizations, announces its partnership with Florida based commerce software integrator, CyberOptic Group, LLC.

The CyOp team has extensive experience in enterprise computing, business process, and open source software application development, and has successfully implemented dozens of Business Process Management & Workflow solutions resulting in increased revenues and growth for its clients.

ProcessMaker is a complete workflow management suite with tools to design forms, create documents, assign roles and users, create routing rules, interconnect with third party systems, and map a process quickly and easily. ProcessMaker allows a business user with zero programming experience to model, automate, and manage a company's unique business processes.

By leveraging Process Maker's open source BPM software with CyOp planning, implementation and support services, even a smaller businesses can afford an enterprise-class workflow management solution with no capital expenses, no hardware to maintain, no software license fees, and no need for on-site technical personnel.

Jonathan Castleman, President of CyberOptic Group stated, "We are extremely pleased to be a Partner of ProcessMaker as the software provides notable functions not found in most traditional ERP and CRM solutions, enabling us to better fulfill the needs of clients where managing the movement of paper, internally and externally, creates a corporate burden."

CyOp can also integrate Process Maker with other robust open source applications including Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), and point of sale (POS) solutions.

About Colosa

Colosa is a developer of software solutions that enable companies to simplify workflow through the capture and automation of business processes.

The company's flagship product, ProcessMaker (www.processmaker.com) is an open source workflow management software application that enables SMEs to automate document intensive, approval-based processes across systems including finance, HR and operations. ProcessMaker is an AJAX enabled, SOA, web-based application which allows users across single and multiple sites to create and share workflows, customize forms, manage processes, and enhance reporting. ProcessMaker OSS is available for download at <http://sourceforge.net/projects/processmaker/> and both versions are available at www.processmaker.com.

Colosa was founded in 2000 and has customers in local and central government, retail and finance. Colosa is based in Cambridge, Massachusetts with offices in Coral Gables, FL; La Paz, Bolivia; and Lima, Peru. For more information visit www.processmaker.com
